

INTERACTIVE WHITEBOARDS AT CPF MONTANA

In order to fulfill its ambition of integrating technology into its teaching programs, CPF Montana equipped its Primary school classes and laboratories with Interactive Whiteboards (IWB) for the back to school 2019.

IWB allows classrooms to turn into an interactive and collaborative space facilitating dynamic teaching and learning approaches.

Used in various subject areas (science, mathematics, languages, music, etc.), IWB helps the teacher to conduct stimulating and joyful classes. Moreover, it triggers the student's curiosity, interest and motivation to learn.

All grade levels will be progressively equipped with IWB.
